

Muhammad Hariz Faizul Anwar

AI Research Fit: LLMs, VLMs, and Reinforcement Learning for practical, reliable intelligent systems

☎ +62 877 557 040 83 | @haeriz42069@gmail.com | 🔗 LinkedIn | 🐙 GitHub | 📁 Portfolio | 📍 Malang, Indonesia

EDUCATION

Universitas Muhammadiyah Malang

Malang, Indonesia

B.Sc. in Informatics Engineering; **GPA: 3.9/4.00**

Sep 2022 – April 2026 (Expected)

Relevant Coursework: Artificial Intelligence, Machine Learning, Natural Language Processing, Data Mining, Information Retrieval, Big Data Analytics, Statistics and Probability, Linear Algebra and Matrices

SKILLS

Programming: Python, SQL, JavaScript, TypeScript, C/C++, Java, C#

Technologies: PyTorch, TensorFlow, FastAPI, Transformers, Pydantic, OpenCV, Docker, Linux, Git/GitHub Actions, Azure, MongoDB, MySQL

Methodologies: Retrieval-augmented generation (RAG), LLM fine-tuning, Reinforcement learning, experiment design, model interpretability, error analysis, literature review

EXPERIENCE

CV Indo Azka Group

Malang, Indonesia

Fullstack Developer

Jan 2025 – March 2025, Internship

- Developed “Depo79,” an e-commerce platform for construction retail using the MERN stack and TypeScript with real-time chat (Socket.IO), JWT auth, and Chart.js analytics dashboard.
- Utilized Zustand for state management and Chakra UI for responsive design. Configured GitHub Actions CI/CD and deployed to Azure Web Services.

Timedoor Academy

Malang, Indonesia

Coding teacher

Dec 2025 – Present, Part-Time

- Delivered a comprehensive curriculum on Python, JavaScript, and game development to students aged 7-17, translating complex computer science concepts into engaging, age-appropriate lessons
- Mentored classes of 10+ students through the full software development lifecycle, resulting in 100% of participants completing functional capstone projects such as interactive websites and mobile apps
- Evaluated individual progress through code reviews and logic puzzles, providing personalized feedback that improved student problem-solving skills and maintained a high course retention rate

PUBLICATIONS

1. Galih Wasis Wicaksono, Nur Putri Hidayah, Christian Sri Kusuma Aditya, Muhammad Hariz Faizul Anwar, Nizam Avif Anhari, Andiko Febriyan Praja Dewa, Herlena Fatikasari, and Mutiara Anggun Puspa Insani.
Leveraging retrieval-augmented generation to support legal question answering: evidence from Indonesian human trafficking court decisions.
International Journal on Informatics Visualization. Accepted, in press.
Dataset: Human Trafficking Court Decisions (Indonesia) Structured Dataset (Mendeley Data V1, [doi:10.17632/8gtbky7r9x.1](https://doi.org/10.17632/8gtbky7r9x.1))
Contribution: Built and evaluated a RAG pipeline on 408 court decisions from 143 district courts (2023–2024). Benchmarked Gemma, LLaMA, and Qwen with ROUGE/BLEU. Best ROUGE-L 0.899 on identitas terdakwa.
2. Muhammad Hariz Faizul Anwar, Nizam Avif Anhari, Galih Wasis Wicaksono, and Nur Putri Hidayah.
Legal-case LLM: an open-source fine-tuned model for Indonesian human trafficking jurisprudence.
Jurnal Informatika. Accepted, in press, [doi:10.30595/juita.v14i1.28345](https://doi.org/10.30595/juita.v14i1.28345).
Model: [Hugging Face model card](#)
Contribution: Curated and cleaned 408 court decisions. Generated synthetic Q&A with Gemini 2.5 Pro and formatted JSON (role/content). Supported L4 fine-tuning and evaluated against Qwen 2.5 3B and Phi-3 3B with ROUGE, BLEU, BERTScore, BARTScore, and Citation-F1.

PROJECTS

Windows Kernel Memory Introspection Engine | [GitHub](#)

- Built a WDM kernel component performing manual x64 virtual-to-physical translation (CR3, PML4, PDPT, PD, PT) with shared-memory/IOCTL interface, delivering stable page-level telemetry independent of user-mode API paths.
- Implemented `ObRegisterCallbacks`-based handle filtering and a transparent DirectX 11 + ImGui overlay with separate memory/render loops for real-time diagnostics.

Unofficial Gemini API Service Toolkit | [GitHub](#)

- Built CLI and HTTP service layers (`gemini`, `start-gemini`, `gemini-api`) with prompt/image handling, request validation, and structured JSON responses for local automation.
- Implemented cookie-loading workflows with browser auto-discovery and a multi-strategy response parser with Pydantic output models for robust multimodal processing.

CERTIFICATIONS, COMMUNICATION & INTERESTS

- **Certifications:** NodeJS MongoDB Developer
- **Skills:** Teaching, Mentoring, Technical Communication, Scientific Writing
- **Interests:** Camping, Composting, Yoga, Traveling, Fishing
- **Spoken languages:** English (TOEIC 865), Japanese, Bahasa Indonesia (Native)
